

## **CURB-IT DESIGN FACTS; WHY CHOOSE US? KNOW THE DIFFERENCE!!**

- Curb-It Design is not a franchise. We have been a locally owned family business in Shakopee & Prior Lake for over 17 years.
- We created a 22 step process that is executed to perfection on every jobsite. Over 35% stronger material recipe than a traditional style curb with 90% more concrete per foot.
- Not every curb is created equally. Height consistency, flowing contours, deep stone texture, vibrant colors, and strength are what we do best. We strive to always provide the best quality materials along with our knowledge and experience of the installation process to make your experience with us flawless. Our 8" wide natural stone style curbing flows well with any landscape.
- In 2008 we started ToughCurb technology and have adapted ahead of the industry to create a superior product. Our secrets in our mix design and process set us apart. We are dedicated to making your landscape dreams a reality.
- The future of curbing is becoming that of a cultured stone, rustic look. This look is perfect for any natural setting landscape. In fact, your end product looks nothing like a curb at all...it looks like stone or rock.
- An engineered concrete border system from Curb-It Design is a great way to keep your flower beds separated from your yard and low maintenance ease of mowing.
- What is the story you would like to tell with your landscape? We are here to communicate and guide you through our process while listening to your needs and vision. Our curbing is the first thing people notice when pulling up to your home and it is what makes your landscape pop! Our process and product is never just x-amount per foot. Even though it's priced by the foot, we are simply not selling landscape bricks from Home Depot. Our concrete artisans design and create details to every foot of your continuously poured concrete edging with great detail.
- We would first like to know the theme of your home, whether it's a modern farmhouse or a unique cottage look, etc. We have many great recommendations that blend and frame in your landscape flawlessly.
- We will work closely with your landscaper or one of our many landscapers that are a good fit for you.
- We are professionals that want to give you that "new car" feeling when you open your garage, except it's your new landscape curbing when you pull into your driveway everyday. You are going to love what you see for the next 40+ years. We feel good about the relationship we have with all our amazing customers!
- Find out what it's like to work with our team on capturing your dream landscape plan.
- Curb It Design LLC is a corporation that holds a 2 MILLION dollar insurance policy as well as workman's comp. for your protection and peace of mind.
